# WACHIRODOL THONGNATE

## ABOUT ME

I am interested in pursuing a Junior Full-stack development role, particularly in a Software House with either WFH or Hybrid options. I have a strong passion for web design and enjoy working on the features that enhance the user experience on websites.

## SKILL

- MTML
- CSS
- Tailwind CSS
- JavaScript
- React,Vite.js
- Vue.js
- Node.js/Express.js
- SQL(PostgreSQL)
- CloudSQL(Supabase)
- NoSQL(MongoDB)
- Git

## PROJECT

### Final Project, Merry match

Developed the admin section with full CRUD functionality for package management and built the payment page, integrating both front-end and back-end features using React, Node.js, Supabase, Tailwind, and DaisyUI, within a Scrum-managed dating website project.

### E-commerce website

Developed an e-commerce website using JavaScript, HTML, and CSS, integrating the DummyJSON API to fetch products and implementing features for adding and removing items from the cart.

### ThaiPaiPan website

It was a project to redesign the website to look more modern compared to the old version that had been used for a long time.

### NeoSen website

It was a project to redesign the website to look more modern compared to the old version that had been used for a long time.

## EXPERIENCE

### Internshiip at oraltal siam resort   April - August 2023

I was a receptionist who welcomed international customers and used English at work. My contributions.
- Improved work efficiency by 20%.
- Served approximately 10 customers per day.
- Earned a performance rating of 8/10 from the resort, which was considered good.

### Freelance 2017-2024

It was a job involving the installation of CCTV cameras and the setup of a LAN system. The latest project was at Tonkampu Restaurant.
- I increased the internet speed from the original 10/100MB to 1000/1000MB and improved the network layout.
- I installed cameras that covered every area of the restaurant, enhancing its security by 90% compared to the old camera system.

## EDUCATION
